# Autonomic® Products Module
# Available on the Compass Control®

AUTONOMIC

Autonomic® Media Servers and Digital Amplifiers are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Autonomic® Autonomic Media Servers and Digital Amplifiers. The Autonomic® Media Server driver will allow for IP control, browsing local music and streaming internet radio such as Pandora, and control queue. The Autonomic® Digital Amplifier driver will allow for RS, Audio EQ, output volume and mute, and source selection controls, while having an integrated control system under their fingertips.

Module Features:

> Bi-Directional Control over IP
> Browse Music on Local Server
> Browse Internet Radio such as Pandora
> Control Queue
