BOSE® ControlSpace® ESP-880 Module Now Available on the Compass Control® Professional

COMPASS CONTROL®
PROFESSIONAL
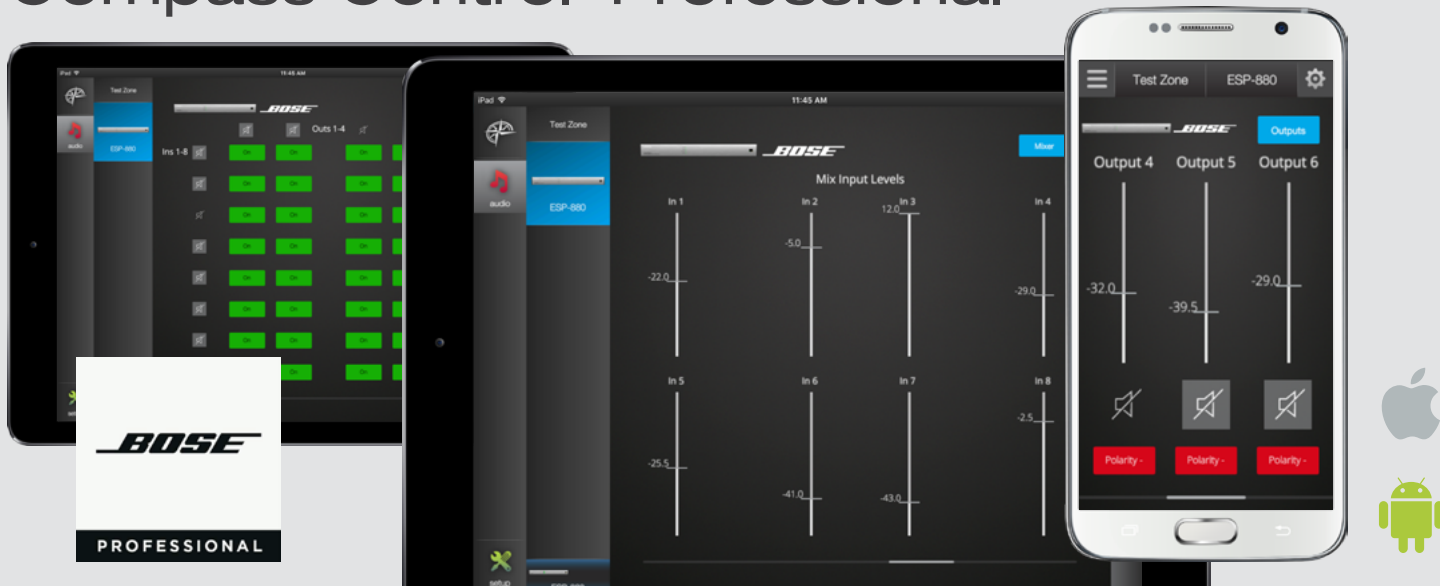

BOSE® ControlSpace® ESP-880 DSP is now compatible with the Compass Control® Pro System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Compass Control® now offers integrators a plug-and-play solution with a BOSE® ControlSpace® ESP-880 module consisting of a bi-directional TCP/IP driver and a pre-configured GUI template. Using the Compass Control® Pro app, users will gain access to key Audio Control features in one elegant interface, and incredible sound quality from BOSE® ControlSpace® ESP-880, while having access to an integrated control system with additional video, climate, security, and automation controls.
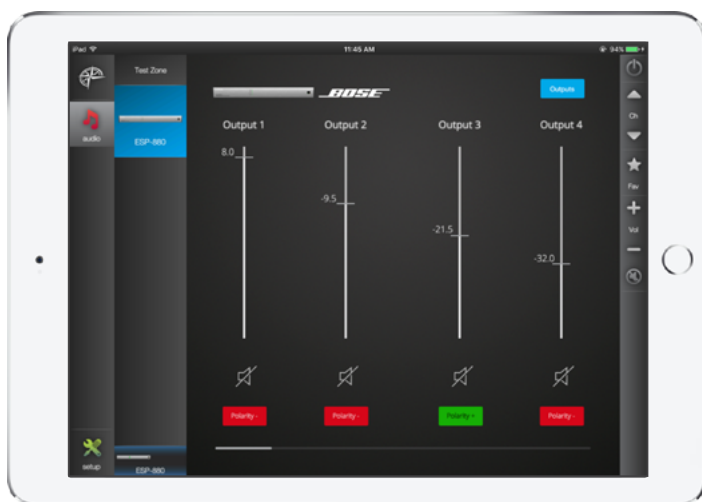

Module Features:

› Bi-directional Feedback:
  › Mix Level, Mix Selection, Mix Mute Control
  › Input Level, Mute, Phantom Control
  › Output Level, Mute, Polarity Control
