## **Key Digital Announces Compass Control Pro Partner Alliance with IC Realtime Surveillance DVRs**

**MOUNT VERNON, NY – December 19, 2017–** IC Realtime’s Flex, Elite, NVR700N and NVR700S2P series video surveillance recorders now natively integrate into Key Digital’s Compass Control® system. As a Compass Alliance™ Partner, IC Realtime worked closely with Key Digital to develop pure bi-directional drivers that provide full DVR control, as well as feedback from the IC Realtime device.

Compass Control is a fully-integrated major control system designed around Apple's iOS devices (iPad®, iPad mini®, iPhone®, and iPod touch®). The system provides installers with bi-directional IR, two-way RS232 with feedback, and two-way TCP/IP control. The new drivers are part of the design software.

“Resulting from cooperative efforts between Key Digital and IC Realtime, the integration of IC Realtime’s DVRs within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s COO, Michael Lakhter.

The Compass Alliance™ Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.

Key Digital is an award winning developer and manufacturer of leading-edge digital video processing and video signal distribution solutions as well as the first fully integrated control system built from the ground up to use iOS and Android, Compass Control Pro. Compass Control Pro offers modular programming or custom design with a blank slate that is limited only by imagination. Compass Control Pro Partner Alliances pre-configured control drivers, modules, and GUI templates integrate instantly and seamlessly to save on precious programming time.

### **About Key Digital®**

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital<sup>®</sup> is known to deliver best-in-class products based on quality, performance, and reliability.
