

Integra® Module Now Available on the Compass Control®

Integra®

Integra® AV Receivers, Preamps and Blu-ray Players are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Integra® AV Receivers, Preamplifiers and Blu-ray Players. Compass Control® module provides iOS/Android access to detailed control and feedback of Integra devices – allowing precise control and constant feedback of information from the AV system, while having access to a fully integrated control system with additional audio, lighting, climate, security, and automation controls.

Module Features:

- › RS and IP Control
- › Playback Controls
- › Full Number Pad
- › Menu and directional buttons
