# SurgeX® Axess Elite Module
Available on the Compass Control®

SURGEX®

SurgeX Axess Elite System is now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with SurgeX Axess Elite System. Compass Control® module enables seamless integration of Axess Elite in the Compass Control environment while greatly reducing the installation time for integrators. Module provides system users outlet-level control, monitoring and management of a system's energy and power usage with additional temperature, voltage, and current draw measurements, while having access to a fully integrated control system with additional video, audio, lighting, climate, security, and automation controls.

Module Features:

› Bi-Directional Control of Smart IP Power Management Systems
› Driver and Module available
› Outlet Control
